

Seilen. Mobile Bass

**Adopted original wire strings
never used for mini-bass before.
Standard EADG tuning in 530-mm sizing.
Realizing ultra-deep bass sound!**

We have created a brand-new mini-bass with a short 530-mm (20.9") scale length, yet able to produce a powerful bass sound. Instead of the urethane rubber strings used in prior products, we adopted originally designed metal strings to focus on the bassists' feeling in their fingertips. The combination of the nylon core and metal windings produces a soft and deep sound. The total length of the instrument is 750 mm (29.5"). The acoustic body AMB model weighs approx. 1 kg (2.2 lb.) and the solid body EMB model approx. 2 kg (4.4 lb.); so both models are very lightweight. For short practices or small sessions, you don't have to carry that heavy bass any more.

AMB Acoustic Mobile Bass

AMB-100

AMB-224

A warm and woody tone is output from a body that has been handcrafted from selected woods, including mahogany and Hawaiian koa. The internal structure gives the body strength with exclusively designed bracings.

Neck: Mahogany (reinforced with carbon fiber); Fingerboard: Rosewood (300R);
Pickups: Five-O (L.R.Bags)

EMB Electric Mobile Bass

EMB-203

EMB-100P

We use alder and light ash for the body as these materials are suited to electric basses. The neck is crafted from maple in order to realize a deep and heavy bass sound in spite of the small size. The controller is 2V1T. The guitar is available with or without a pick guard. As a special order, we can also manufacture a piezoelectric model without magnetic pickups.

Neck: Maple (reinforced with carbon fiber); Fingerboard: Rosewood (300 R);
Pickups: Seilen's original pickups

Seilen. Mobile Bass

Releasing an Eagerly-awaited Five String Version of the Mobile Bass EMB!

Seilen's originally developed exclusive strings make a well-tuned low B possible. Forget about huge, heavy multi-string basses and enjoy ultra-bass sound with the compact, lightweight EMB.

[4 photo] EMB-204/5 \$2,000

Neck: Maple; Fingerboard: Rosewood;

Top: Hawaiian curly koa;

Back: Alder; Pickups: Original pickups (passive)

PRICE LIST

*In the standard specification, the body back is made from alder. *All prices exclude tax.

Seilen is a musical instrument manufacturer located in Matsumoto, Nagano, Japan. The area has a dry climate suitable for making musical instruments. It is a private brand of Shinji Takahashi who has over 30 years' experience in making instruments, such as electric guitars, electric basses, acoustic guitars, and ukuleles. Seilen produce excellent handcrafted instruments in small batches. The company's products are highly regarded overseas. They have been exhibited at a museum in San Francisco and have won the grand prize several times at the International Musical Instrument Exhibition in Hawaii.
